THE THERMOMETRY AND DISINFECTION INTEGRATED CHANNEL

This is used for disinfection of the human body and other objects at the entrances to public spaces. It is simple, safe, intuitive and accurate. It can detect abnormal temperature (i.e. higher than the set temperature) in a person and activate a voice alarm to prevent passage through the disinfection channel. The operation of the equipment is under intelligent control, and there is no need for special personnel to operate it. The equipment has many useful functions, such as easy liquid feeding, real time display of running state, and automatic detection of entry and exit objects.

**Disinfection
of body**

Advantages:

- ❖ Automatic Infrared Body Temperature Measurement, Sound and Light Alarm
- ❖ Voice Broadcast Function
- ❖ Automatic Contact less Hand Sanitizing
- ❖ Food Grade Disinfectant to Ensure Human Health and Safety
- ❖ Automatic Full Body Disinfection
- ❖ Disinfection is with vapors not spray for effectiveness
- ❖ Movable and easy-installation
- ❖ Power 220V/1Ph/50Hz
