PP60 GROCERY BAG DISINFECTION UNIT TECHNICAL SPECIFICATIONS

As a complete solution for grocery bag disinfection produced for markets and shopping malls, which are among the most common areas where viruses spread, this unit provides complete sterilization by detecting the bag with infrared motion sensors.

In areas such as grocery stores, shopping malls, retail stores, super / hypermarkets, the products that leave the cash counter are disinfected within seconds.

This is a stand-alone unit with a built-in storage tank. You can start using the unit by filling the disinfectant liquid and plugging in the power cable.

- Ideal for shopping malls, markets, retail stores and groceries
- Standalone unit with built-in Disinfectant Storage Tank
- 60 ltr storage tank capacity
